Request for Qualifications
For
Sewer System Evaluation (SSES)
SOQ No. 179821.78.0003

Black & Veatch and Overland Contracting (a subsidiary of Black & Veatch), as the Program Manager and Construction Manager for the Sewer Assessment and Rehabilitation (SARP 10) Program on behalf of the City of Memphis, is soliciting qualification packages for conducting a Sewer System Evaluation Survey (SSES) in two areas in the sanitary sewer collection system within the City. The inspection and condition assessment activities for the SSES are to be undertaken by one or more selected contractors for the purpose of documenting the existing condition of approximately 100,000 to 300,000 linear feet of the sanitary sewer system.

Beginning on December 17, 2013, the documents comprising the Request for Qualifications may be obtained from Overland Contracting Inc., Attn: Bently Green, Black & Veatch, 3485 Poplar Avenue, Suite 230, Memphis, TN 38111 during the hours of 8:30 AM-4:00 PM Monday through Friday. This information is also available on the City of Memphis website at the following link:

<http://www.memphistn.gov/Government/PublicWorks/UpcomingProjects.aspx>

The sewer inspection services for which qualifications are being sought include:

- Location of the manhole(s) in the designated areas of the collection system and documentation of manhole inspections in compliance with NAASCO's Manhole Assessment Certification Program (MACP) compliant protocols and formats. These inspections will be supplemented by the following;
 1. Location of manhole structures based on various map source documents of varying quality.
 2. Gathering of sub-meter Global Positioning System (GPS) coordinates for each manhole cover, and;
 3. The use of a pole camera inspection to digitally document the manhole wall and pipe connections,
 4. Perform pole camera inspections from the manhole of each adjacent pipe attached to the manhole (incoming and outgoing).
- Coordinate field operations with the City and Program Manager and conduct customer outreach prior to the execution of smoke-testing and subsequent dyed water flooding of selected smoke release points of the designated portions of the wastewater collection system. Confirmed smoke release locations from the collection system on both public and private property will be documented with digital, written records and sub-meter GPS coordinates of the smoke release location.
- Perform light cleaning preceding CCTV inspections conducted in accordance with NASSCO's Pipeline Assessment Certification Program (PACP) compliant protocols and formats. Digitally record the inspections in a non-proprietary video format. Heavy cleaning of any pipe segment would need to be pre-approved by the Program Manager.
- Perform selected larger diameter sanitary sewer inspections using optional sonar/radar/CCTV as directed.

- Portions of the collection will be both in public rights of ways, backyards and in wooded easements. Traffic control and access to the variety of different collection system assets to be inspected and assessed will be a contractor responsibility.
- Delivery of digital MACP/PACP compliant database records in Geographic Information System (GIS) ready formats (specifications to be provided), digital site inspection photographs / videos, and other associated digital records.

Interested firms should submit their statement of qualifications for this project. Statements of Qualifications (SOQs) will be received up and until 3:00 PM local time on January 10, 2014. The SOQ submittals will be received at the SARP 10 Program Office, 3485 Poplar Avenue, Suite 230, Memphis, TN 38111. **One original and three (3)** copies of all Responses shall be prepared and submitted in accordance with the Request for Qualification instructions.

OCI is an affirmative action employer.
