Subject: Bids for Front Street and Mud Island Interceptor Rehab

Unfortunately, SARP10 only received one bid for the Front Street and Mud Island Interceptor Rehabilitation Project. This Bid exceeded our estimate for the work. As a result of having only one bid submitted, the project being more expensive than planned and other informalities SARP10 has elected to rebid the project. We have applied “value engineering” and revised the scope to only include CD required projects so the next bid will be more consistent with industry prices.

Very truly yours,

BLACK & VEATCH
